

YES,

"Anyone intensely interested in productivity who sees 4th Dimension becomes a Mac convert."

"Four years ago, Macintosh™ opened a new era in computing. Now, 4th Dimension opens a new era in databases. For the first time, you are not forced to trade power for ease of use. 4th Dimension endows individuals with an elegant tool to analyze and control information — simple or complex, single user or multiuser.

Can you, a first time user, get great results quickly with a relational database?

Yes, you can.

Can you, a developer, get more freedom, more features, more support to create outstanding products?

Yes, you can.

Can you, a dealer, confidently deliver a database solution?

Yes, you can.

No compromises. No sacrifices. 4th Dimension has so much power it will make your head explode.

Buy 4th Dimension and own a piece of the Macintosh dream."

Guy Kawasaki

Ex-Macintosh software evangelist ■

"I have absolutely no training in databases, but I'm now using 4th Dimension day in and day out."

"Anything I want, I can build by myself.

The graphics are super. 4th Dimension is so easy to set up, easy to modify, flexible and powerful. And I'm getting technical support from ACIUS anytime I need it.

4th Dimension doesn't eat data. If I make a mistake, data is preserved. I've never needed a backup copy of anything, and I've put it through some pretty severe torturing."

Walter W. Stewart

4th Dimension end user

*Research Physicist, National Institutes of Health** ■

"4th Dimension is the most powerful database I've ever recommended for a micro."

"And it's in the same class as the most powerful databases for minis and mainframes.

We've sold a lot of them. I feel good about recommending it, whether to low end users or high.

It's easy to use and easy to program. You have all the features of the Mac interface that make it easy. Windows. Menus. Buttons. Scrollable areas. Graphics.

It simply gives you all the tools you need to fully exploit the Mac and bring new power to your specific applications.

YOU CAN.

In fact, I've become a developer myself. I wanted a point of sale application to run my business. I developed the system originally on a competitive product, but it didn't have the horsepower to solve the problems. 4th Dimension has the power to do anything I want to do.

I can offer no more sincere testimonial for the products I sell than to use them to manage my own business."

Dick Applebaum
Apple dealer and business co-owner
Computer Plus, Inc. ■

"When you sit down at a computer, there are two ways to go, IBM® or user friendly."

"In other words, what you see is what you're used to working with.

These are the reasons I like 4th Dimension: It's got the power to do everything I need in a com-

plex vertical market. It's got the interface to make that possible without taking on a second career. It's got layout graphics that can make your product look as good as it works.

You can sit down and use 4th Dimension without doing much to it, and you still have complete power. It has some dynamic, *dynamic* graphics. All this without programming. The others bog you down in housekeeping chores.

The custom mode enables me to use words, sentences, phrases, and icons that are familiar to my people in the real estate business. I have the ability to customize menus and menu items.

I enjoy working with 4th Dimension because of its power, interface, and the ability to create custom programs for my clients. I can't think of anything better than 4th Dimension as a development tool, and I've looked at them all."

Ted Bohrer
Developer
Concept 2001 ■

"The thing I like best about 4th Dimension is that it works the way I expect it to work."

"The whole screen interface is so much nicer than the others.

With dBASE™ I spend a lot of time looking at the books and then creating screens. I never get it near right the first ten times.

I really like the way the subfiles work. I use that a lot because I maintain inventory sheets and I need to pull information from other places.

I like how it does everything automatically, like buttons, radio buttons, check boxes, and scrollable windows. You really don't need training to use these features."

Diana Foster
4th Dimension user
PC Coordinator ■
